About Me

I am a developer who likes to develop with front-end technologies. Well-versed in HTML, CSS, JS, and react. I learn any front-end technology quickly, with strong problem-solving ability, a positive attitude, teamwork, and a background in boot camps that I have attended. Here's what I have seen in the boot camps I have attended. If you can not communicate well and handle stress, your code does not matter. Also, I am an organizer on GDG KONYA, which shows that good communication is important to me. I believe I can add value to your company with all these soft skills and technical knowledge.

Projects

Frontend Development   DEMO | CODE

Oct 2022 - Dec 2022

A website has been developed for digital marketing.

- Technologies: HTML, CSS, JS, react
- Logo created.
- An appointment form has been created using smtp.js.
